

IMPORTANT INFORMATION REGARDING YOUR SECURITY SERVICES

\*\*\*\*\* URGENT NOTICE \*\*\*\*\*

Dear Valued Customer:

The U.S. Federal Communications Commission (FCC) has ruled that cellular telephone companies will not be required to support the analog cellular wireless network after February 18, 2008. All alarm systems using analog radio equipment to send wireless signals, which are provided by a wireless telephone company, will be discontinued at this time.

You can access the following website [www.fcc.gov/cgb/consumerfacts/analogcellphone.html](http://www.fcc.gov/cgb/consumerfacts/analogcellphone.html) for more detailed information.

If you had your cellular back-up system installed **PRIOR** to January, 2007, it is likely that your cellular back-up system will need to be updated; it will no longer function after February 18, 2008.

Please contact us as soon as possible at 866-552-0273, to review your account and schedule a service call (if required) in order to ensure your security protection continues without interruption.

We appreciate your business and look forward to fulfilling your security needs for many years to come.

Sincerely,

A handwritten signature in black ink that reads "Cindy J. Beare".

Cindy J. Beare  
Special Projects Manager
